Non-UI Students on campus

**On a clinical rotation**

If you will be on campus for a rotation, check with your instructor ahead of time where you should seek medical care if there is a BBPE or injury while on the UI campus. Follow those instructions if they differ from the below.

Wash/flush the exposed area

- Blood on broken skin (cuts, scratches etc.): clean the wound with soap and water immediately.
- Splashes: flush mucous membranes with clean water. For eye exposure: remove contacts, if present and flush eyes using an eye wash station for a minimum of 5 minutes. If unsure where to find an eye wash station, start flushing with tap water or sterile eye irritant immediately for 5 minutes while an eye wash station is located.

Inform your instructor/preceptor/attending physician

Identify the source of exposure, including name/hospital number/ID of individual if applicable (preceptor, RA or hospital staff can assist with this)

**Kirkwood student on clinical rotation**

**Clinical Rotation, not Kirkwood**

Get Medical Care at:
University Employee Health Clinic (UEHC) between 7:00am-4:30pm, Monday through Friday, excluding holidays.
Location: General Hospital, first floor Boyd Tower near Elevator A.
Phone 356-3631
OR
University of Iowa Hospitals and Clinics Emergency Treatment Center when UEHC is closed.

**Not on clinical rotation**

Go to the University of Iowa Hospitals and Clinics Emergency Treatment Center
